Guarantee

Belt clip

The line adaptor may not be attached to the line cord. You may find the line adaptor in the box. In this case, you have to connect the line adaptor to the line cord first before plugging the line cord to the line socket.
In multi-handset packs, you will find one or more additional handsets, chargers with power supply units and additional rechargeable batteries.

⚠ **Warning** Always use the cables and batteries that are supplied with your phone.

1 Connect
Connect the base station

1. Insert the plug of the power cord into the socket under the base station.
2. Insert the plug of the line cord into the socket under the base station.

3. Connect the other end of the line cord together with the line adaptor if necessary, to the telephone line socket and the other end of the power cable to the electricity socket.

2 Install
Insert rechargeable batteries and charge

Insert batteries

See CD445 user manual for details about the answering machine function.

Troubleshooting

For more information, see the user manual that came with your CD440 or CD445.

Problem	Solution
No dialing tone	• Charge the batteries for at least 24 hours • Move closer to the base station • Use the line cable provided in the box
Poor audio quality	• Move closer to the base station • Move the base station at least one metre away from any electrical appliances
The ⅄ is blinking	• Register the handset to the base station • Move closer to the base station
The handset LCD displays nothing	• Try again by disconnecting and connecting the base station power supply and follow the procedure to register a handset • Make sure the two supplied rechargeable batteries have been inserted into the battery compartment • Make sure the supplied batteries are charged up
Caller Line Identification (CLI) service does not work	• Check your subscription with your network operator
