- Built-in mics remove environmental sound on a call

Sound without earphones. From run to ride

- Lightweight. Tough. Comfortable
- Ready to go. Carry pouch included
- Custom sound control and more. Philips Headphones app

PHILIPS

Open-ear wireless sports headphones
Open-ear fit Bone conduction, Lightweight and rugged, IP67 dust/water protection

TAA6606BK/00

Highlights

9 hours play time

With 9 hours play time from a single charge, these bone-conducting open-ear headphones are with you for the length of the race. A full charge takes 2 hours via USB-C. Need an extra boost? Just 15 minutes charging gives you an extra hour of play time.

Bone conduction

Bone conduction technology transmits sound through the bones of your skull, leaving your ears completely open to your environment. You can enjoy your music and podcasts, and still hear your feet hitting the trail. Or a car getting too close to your rear wheel.

Easy control and pairing

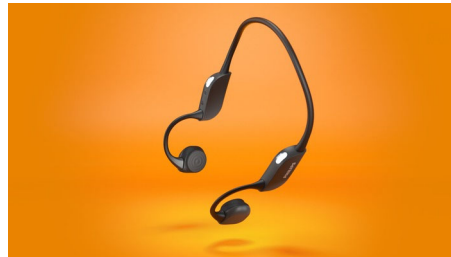

Buttons on the frame let you pause your playlist, take calls, control volume, and more. The headphones are ready to pair the instant you switch on Bluetooth. Built-in mics remove

environmental sound, so your voice is clearly heard when you call someone.

IP67 dust/water protection

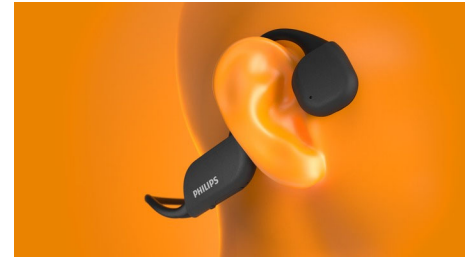

Ride your favorite trail. Run in a rainstorm. An IP67 rating ensures nothing can hold back the adventure! However hard you sweat, and wherever you go, your headphones will keep up. When you're done, and the headphones are dry, store them in the soft carry pouch.

Lightweight and comfortable

Experience a new kind of comfort. The securely fitting, lightweight frame is engineered from titanium-and wrapped in rubber to keep it flexible. With nothing in or on your ears, you're free to train without distraction.

Open-ear design

Need total awareness of your surroundings while you run or ride? The unique open-ear design of these bone-conducting headphones means they're perfect for race day. With nothing in your ears at all, you'll hear everything you need to-and your music too.

Philips Headphones app

The Philips Headphones app lets you control the LED running lights and puts you in charge of the music you're listening to. Enhance the bass. Tone down the treble. You can adjust sound levels yourself or choose from preset listening styles.

Safe LED

Run with confidence-whether it's a night race or evening training. LED running lights on the rear of the frame keep you visible in dim environments. You can control the LEDs via the Philips Headphones app.

Specifications

Sound

- Impedance: 4 Ohm
- Speaker diameter: 15 mm
- Sensitivity: 87 dB (1K Hz)
- Frequency range: 130 - 16 000 Hz
- Maximum power input: 300 mW
